Assignment 7 - Assignment on Change the Shell environment.

The objective of this assignment is to guide students through the process of changing the shell environment in Red Hat Enterprise Linux (RHEL) 9.

If you encounter any difficulties during the assignment, refer to the provided resources

Questions for this assignment

1. How to change the default shell for a user using the **chsh** command?
2. How to modify the **PATH** environment variable to include additional directories?
3. How to set a custom command prompt (**PS1**) to display useful information?

Solution by the Instructor:

1. How to change the default shell for a user using the chsh command?

   To change the default shell for a user, use the chsh command followed by the desired shell.

2. How to modify the PATH environment variable to include additional directories?

   To modify the PATH environment variable, use the export command followed by the new PATH value.

3. How to set a custom command prompt (PS1) to display useful information?

   export PATH=$PATH:/custom/directory to add /custom/directory to the PATH.
